

Carbon Steel CNC Machining Parts

Features of machining carbon steel parts:

- Product name:
- Material: Carbon Steel: 20#, 45#, 12L14,Q235
- Machining Tolerances:0.01mm
- Machining Process:
CNC Turning, CNC Milling, Grinding, Threading, Tapping, Bending, Welding, Drilling, Forging
- Min. Order:500PCS
- Surface Treatment: Polishing, Heat Treatment, Sand Blasting, Zinc Plated, Anodization, Chemical Fim,
- Packing: Carton Box, Blister tray, Pallet, Wooden Case.
- Certificate:ISO9001:2008, ISO/TS16949

[CNC machine automotive parts](#) of our company are of good quality and low price. We provide [CNC auto parts](#) as well. Welcome to our website to know more details.

What we can Provide:		Machining Material:	
CNC Machining Service		Carbon Steel	
CNC Turning Service		Stainless Steel	
CNC Milling Service		Aluminum	
Cold Forging Service		Brass	
Metal Stamping Service		Copper	
		Titanium Alloy	
Surface Treatment		Application:	
Heat Treatment		Automobile Spare Parts	
Sand Blasting		Electrical Appliance Industry	
Polishing		Electronics Industry	
Zinc Plated		General Industry	
Anodization		Machinery and Equipment	
Chemical Fim		Hydraulic and Pneumatic	

Carbon Steel CNC Machining Parts Features:

Carbon steel is the carbon content was 0.0218% ~ 2.11% of the iron carbon alloy. Also called carbon steel. Usually contains a small amount of silicon, manganese, sulfur and phosphorus. Carbon content is higher in general carbon steel, the greater the hardness, the higher the strength also, but low plasticity.

Feature:

Low price, process performance (e.g., weldability and cold formability) good.

Application:

General engineering structure, auto parts and general machinery parts. Such as Q235 can produce bolts, nuts, pins, hook and less important mechanical parts and structure of rebar steel,
